PDF- Printing Multiple slides on a page from a PC

Space and Ink Saver

If you're wanting to print more than one slide of a PDF document on a sheet of paper, please follow these steps:

1. Press "CTRL + P" or go to "File, Print"

2. Drop down the box that says "Full Page Slides"

Select the display you'd like.

You should see what it will look like to the right.

3. Select "Print" if everything looks good.

PDF- Printing Multiple slides on a page from a Mac

Space and Ink Saver

If you're wanting to print more than one slide of a PDF document on a sheet of paper, please follow these steps:

1. Press "Cmd + P" or go to "File, Print"

2. When the print options box appears, select the drop down box by "Preview" Change it to "Layout".

You should see what it will print like to the left.

3. Here is where you will set up your printing details. Designate how many slides you'd like to print to a page, and the layout direction. The ones circled make the most sense, but use which ever you prefer.
