Canvas– Accessibility Checker

Take advantage of Canvas' Accessibility Checker!

More Info

The Rich Content Editor includes an accessibility tool that checks common accessibility errors within the editor. This tool can help you design course content while considering accessibility attributes and is located in the Rich Content Edi-
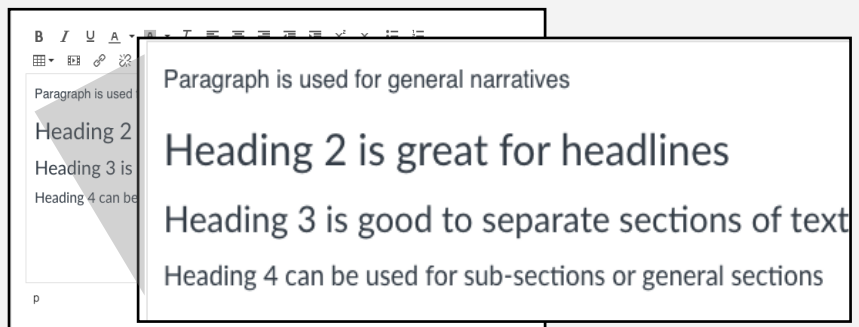

1. Select the Accessibility Icon.

2. You will receive a message letting you know if your content has any accessibility issues.

3. Make adjustments if Necessary.

Accessibility Checker

No accessibility issues were detected.

Accessibility Checker

Issue 1/7

Tables should include a caption describing the contents of the table.

Add a caption

TT Distance Education

Going the Distance for our students!

TIPS — Use Headings:

Paragraph is used for general narratives

Heading 2 is great for headlines

Heading 3 is good to separate sections of text

Heading 4 can be used for sub-sections or general sections

TIPS — ALT Text

When using pictures in your course shell, don't forget to add **ALT TEXT**. The alt text should be a description of the image so that all students who use screen readers can have an idea of what the image is.

TIPS — Grid/Tables

Try to stay away from the grid unless necessary. Screen Readers have a hard time translating the content in them. If you need tables, include a caption describing the content
