

Due Dates

- » To avoid any submissions errors, please do NOT use the Available UNTIL date.
- » * Be sure the [Start and Due dates](#) in Canvas and in Turnitin match.

Feedback Release Date:

If you want students to receive their results instantly, set the date the same as the start date.

Late Submissions

Settings NOT supported by Turnitin within Canvas

- [Extended time/s Date/s](#)—for specific students
- Late submission settings*

Late Submissions:

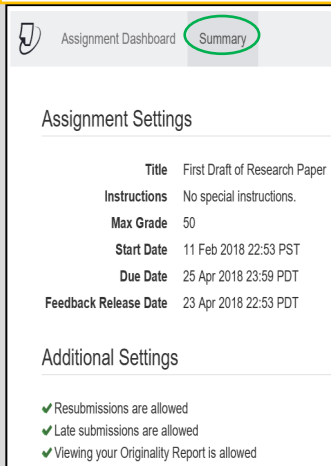

- » -ONLY students that do NOT have a submission can submit a “late” submission past the due date.
- » -A student that has submitted before the due date would NOT be able to resubmit as a late submission past the due date.
- » -If you want to allow extended dates and/or Late submissions: you will need to establish this from within ([Turnitin & Canvas](#)).

Example:

If your Canvas due date is May 12th

In Turnitin you have a due date of May 12th, but **also have the “[Accept Late Submissions](#)” option checked** , **Canvas will lock students out on MAY 12th**.
