

## How to Create a Sandbox (Development) Shell:

[Back to Fac. Toolbox](#)

**Important:** Keep the naming convention that we use for Sandboxes

### Naming Convention:

**SB** (Course & Section) (Instructor Initials)

**Example:** SB BIOL-40 AB

Go to your dashboard, and select the “[Start a New Course](#)” button on the bottom right hand side, or all the way at the bottom of your page. Location depends on the width of your screen.

You will be given a box that allows you to name your course. Follow the prompts and you will soon have a fresh sandbox shell. Here you can develop your course.

## Copying Developed Content into an Empty Shell

If you are ready to copy your Sandbox material into a **LIVE** shell, here is a video tutorial on how to copy canvas content into an empty shell:
