

Who is Ready for a Chance to WIN!

Hey Guys,

We are in **Week 7!** So much time has passed so quickly. You will be done before you know it!

I hope you are all on track with your courses and feeling confident! If you aren't, we will list some help for you.

Here's what You Have To Do To WIN:

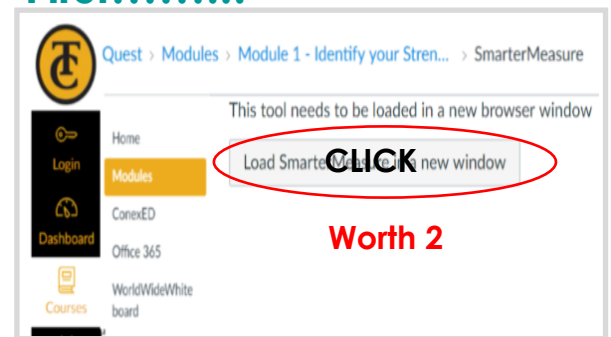

1. Please follow this [Quest readiness link](#) and complete the online readiness assessment.
(Worth 2 raffle entries)
2. After completing the assessment, let us know your thoughts on the assessment:
(Worth 3 raffle entries)
 - Is it a valuable tool to offer our online students?
 - What did you like or dislike about it?
 - Let us know what you think will help us in offering something like this to TC students.

We'd like to see if this tool would serve as a helpful online aid for TC students. This tool is designed to assess the type of learner you are and offer help that best serves your needs.

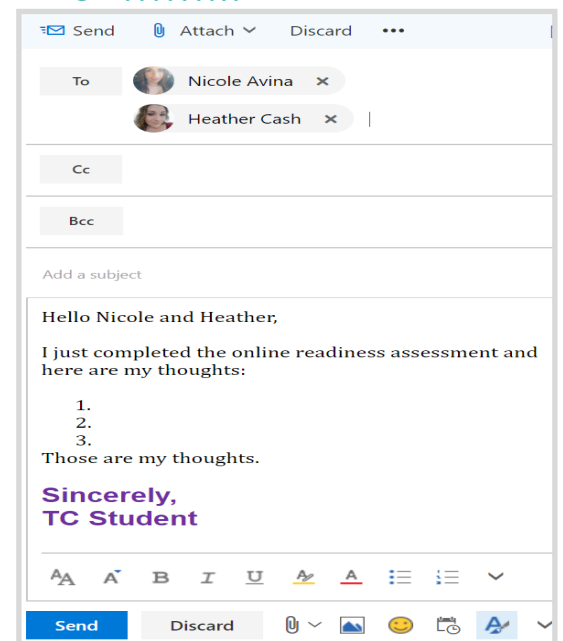

As always, **your input is so important to us.** If you help give us feedback we can offer the best support for you possible.

10 Winners will be chosen!

First.....

Then.....

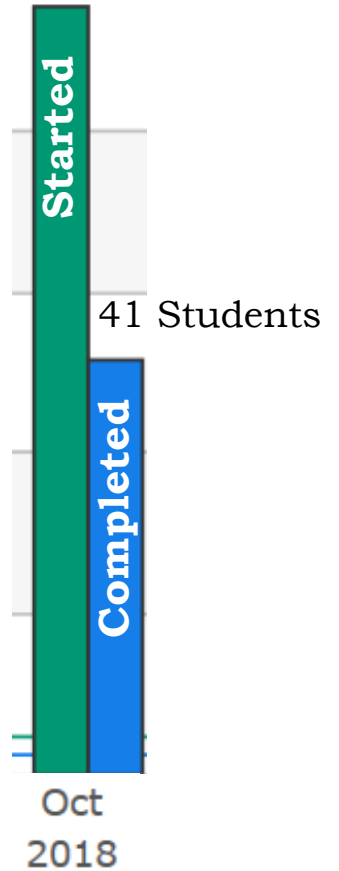

Email us at:

What did student shave to say?

Pros:

- Students loved finding out their Typing speed
- Some liked knowing their reading fluency

Typing Speed Summary

Text Given: Probably the greatest benefit of online education is the incredible convenience that it offers. Unlike a traditional class, online courses usually do not have regular meetings. There still may be due dates for assignments and exams, and you may have scheduled chat sessions.

Text Typed: probably the greatest benefit of online education is the incredible convenience that it offers. Unlike traditional class, online courses usually do not have regular meetings. There still may be due dates for assignments and exams, and you may have scheduled chat sessions.

Errors Found: **Probably** the greatest benefit of online education is the incredible **convenience** that it offers. **Unlike a** traditional class, online courses usually do not have regular meetings. **There** still may be due dates for assignments and exams, and you may have scheduled chat sessions.

Your typing accuracy was measured at 88%

Your typing speed was measured at 42 WPM

Average Typing Speeds

Top 10%	64 - 120 WPM
2nd 10%	56 - 63 WPM
3rd 10%	49 - 55 WPM
4th 10%	44 - 48 WPM

Reading Fluency Summary

Reading Rate & Recall

The average adult reading rate for English prose text in the United States is around 250 to 300 words per minute. Research shows that reading is around 25% slower from a computer screen than from paper. Thus you may slightly increase your results to find your speed when reading from paper.

Your on-screen reading recall was measured at 20% as indicated below

Your on-screen reading rate was measured at 292 WPM as indicated below

Students who scored similar on this section have found the following resources particularly beneficial for improving their online learning readiness skills.

- Budgeting time for studying.
- Effective study skills

Solitary Logical Aural Physical Visual Social Verbal

Solitary (intrapersonal) – When it is time to focus on a learning task, you prefer to be alone.

Do you find that you can think best when you are not distracted by others?

Have you ever found yourself retreating to a quiet place when it is time to study? Have you ever turned down an invitation to study with a group? Do you consider yourself to be introspective – aware of your own thoughts and feelings? Do you keep a journal or other private log? Are self-help books one of your favorite types of reading? Do you tend to select vacation places that are not too crowded? If these statements describe you, then you probably are inclined toward a solitary learning style.

Contrary to popular beliefs, people with a solitary learning style are not necessarily "loners." In fact they may really enjoy being around others and have many friends. But when it comes time to mentally focus on a task such as studying for a test, people with a solitary learning style feel more natural and can be more productive when alone.

Solitary learners are often typified as being "thinkers." Solitary learners enjoy a peaceful and quiet moment alone with their thoughts. Because of this, they are typically aware of their own thoughts and emotions. They often are highly motivated because they take time to assess their own accomplishments and goals.
