Dates](#)

## Navigation Icons

### Start Here: If a student's login info doesn't work.....

Open up **two browsers**. One for **student look up** in and one to try **logging as them**. (Chrome, Explorer, Edge).

**If** their password doesn't work, Check for them in the [Active Directory](#)– [Portal Guard Help Desk](#).

**If** they do NOT exist (A number not found)- **Call IT** to see if they can add the student to the Active Directory & add Canvas Icon to Portal Guard

**If** you do not get ahold of anyone, **send an email** with the students **A number and First and last name**.

## Something went wrong

Tools for technical support:

Are you using [Google Chrome](#) as your browser?– (Chrome is the preferred for Canvas.) Maybe you can't scroll all the way down to where the submit button is, or only part of a page is visible and you can scroll to see the rest, chances are, your browser is NOT Chrome.

[Disable Pop-Up Blocker](#)–

If you notice when you click on a link and nothing happens, the screen doesn't appear to load, chances are it's the pop-up blocker. This is seen a lot in Math classes that use [MyMathLab](#)

[Reset Your Web Browser- \(Delete Cookies\)](#)

If you notice unwanted pop-ups, toolbars, extensions you didn't install, you may want to reset your browser to it's original settings. **WARNING:** This will remove all remembered info
