

Creating a FlipGrid Assignment

[Back to Fac. Toolbox](#)

Now that you have FlipGrid set up, we can create your first Assignment!

This will be done in Canvas

1. Start by going to **your class** where you just added FlipGrid.
2. Then go to your **Assignments**.
3. Add a **new Assignment**.
4. Enter your Title, Directions, Points, and Due Dates like normal. In the **Submission** Type change the Type to **External Tool**.
5. Click the **Find** button, then scroll down to FlipGrid.
6. Click on **FlipGrid** then click **Select**.
7. Don't forget to enter in your Attempts and Due Dates. Once you are done, click Save.

Now let's get editing with FlipGrid!

1. After Saving you should see a pop up about connecting a Flipgrid to Canvas. Click **Create a Course Group**.
2. The Title and instructions will pull from Canvas. If you did not create any instructions click on the **Pencil to edit**.
3. From here you can **Edit** the Title, Instructions\ Prompt, Recording Time, and enable Video Moderation. **Video Moderation** hides videos until you have seen and approved them.
4. You can also **Add Media** to your instructions to help engage your students.
5. Under **Topic Status** you will want to set your Status to open. Also, set your open and close dates for the assignment. **Please make sure these match the Canvas dates.**
6. Then scroll down and click **Update Topic**.
