RESOLUTION 2020/21-06

**BOARD OF TRUSTEES
WEST KERN COMMUNITY COLLEGE DISTRICT**

21st Century Energy Systems Resolution

WHEREAS, California's energy policies are critical to reducing greenhouse gas emissions and reducing the impact of climate change on the state's population; and

WHEREAS, the state legislature and state agencies are increasingly proposing new legislation and regulations eliminating choice of energy by mandating technologies to power buildings and public and private fleets as a strategy to achieve the state's climate goals; and

WHEREAS, clean, affordable and reliable energy is crucial to the material health, safety and well-being of students, teachers, school administration and staff; and

WHEREAS, California ranks 41st in the nation in per pupil funding; and

WHEREAS, there are multiple state and federal public school unfunded or underfunded mandates affecting students, teachers, school administration and staff, and placing a burden on districts to make difficult choices to remain within budget constraints; and

WHEREAS, West Kern Community College District values local control and the right to choose the policies and investments that most affordably and efficiently enables the school district to comply with state requirements; and

WHEREAS, building and vehicle technology mandates eliminate local control, suppress innovation, reduce reliability and unnecessarily increase costs for school districts; and

WHEREAS, West Kern Community College District understands that relying on a single energy delivery system unnecessarily increases vulnerability to natural and man-made disasters, and that a diversity of energy delivery systems and resources contribute to greater reliability and resilience; and

WHEREAS, West Kern Community College District understands the need to mitigate the impacts of climate change and is committed to doing its part to help the state achieve its climate goals, but requires the flexibility to do so in a manner that best serves the needs of its students, teachers, school administration and staff; and

BE IT RESOLVED, by the West Kern Community College District Board of Trustees, as follows:

That the Board of Trustees supports balanced energy solutions that provide it with the decision-making authority and resources needed to achieve the state's climate goals and supports proposed state legislation and regulation that retains local control by allowing all technologies and energy resources that can power buildings and fuel vehicles, and also meet or exceed emissions reductions regulations.

IN WITNESS of the adoption of the foregoing Resolution 2020/21-06 at a duly called regular meeting of the West Kern Community College Board of Trustees held the 11th day of November, 2020; the following members of the said Board have affixed their signatures.

Health Risks

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increase the incidence of a variety of aggressive acts, including spouse and child abuse. Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described.

Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life-threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and mental retardation. In addition, research indicates that children of alcoholic parents are at greater risk than other youngsters of becoming alcoholics.
